EXPERIMENT 7: REQUIREMENT PRIORITIZATION USING MoSCoW AND KANO MODELS

Aim

To prioritize the requirements of a Task Management System using MoSCoW and Kano models in Jira.

Procedure

1. Open Jira and access the Task Management System project.

2. Create four work items: User Login and Role Assignment, Task Creation and Assignment, Task Prioritization and Deadlines, and Progress Tracking and Reporting.

3. Open the List view and display the MoSCoW and Kano columns.

4. Assign Must Have and Basic to User Login and Role Assignment.

5. Assign Must Have and Basic to Task Creation and Assignment.

6. Assign Should Have and Performance to Task Prioritization and Deadlines.

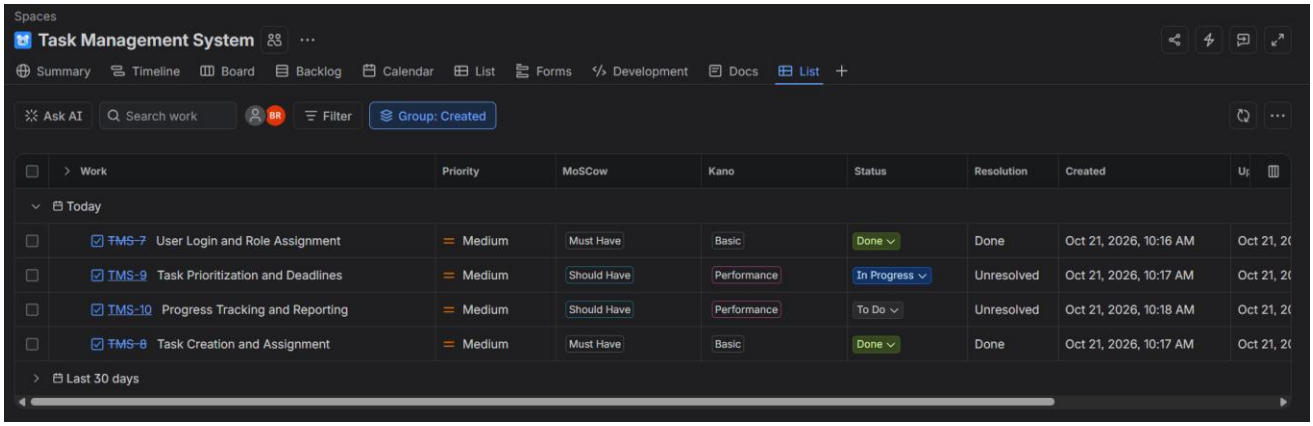

7. Assign Should Have and Performance to Progress Tracking and Reporting.

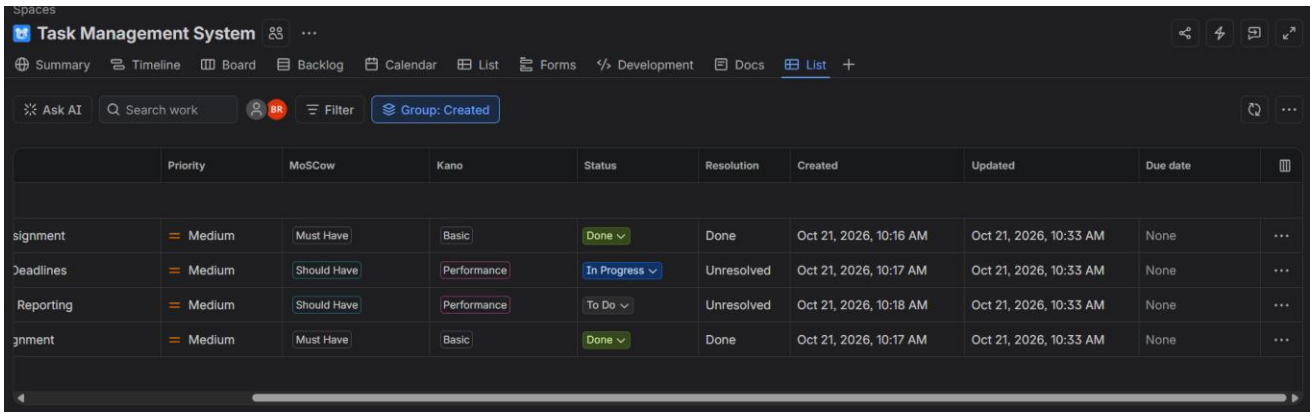

8. Verify that all four requirements and their classifications are displayed correctly in Jira.

9. Capture a screenshot showing the four requirements with their MoSCoW and Kano classifications.

Output

Screenshot showing the four requirements prioritized using MoSCoW and Kano models in Jira.

Result

Thus, the requirements of the Task Management System were successfully prioritized using MoSCoW and Kano models in Jira.
