

EXP-3

E-Commerce Mobile App Prototype (Figma)

Aim

To create a prototype of an E-Commerce mobile application using Figma for discussing the user interface design with stakeholders and obtaining their feedback and approval.

Procedure

1. Open Figma and create a new design file.
2. Design the E-Commerce mobile app interface.
3. Create the Home screen with categories, offers, and products.
4. Create the Product Listing screen with available products.
5. Create the Product Details screen with product information and an Add to Cart option.
6. Create the Shopping Cart screen with selected products and order summary.
7. Create the Checkout screen with delivery address, payment method, and place order option.
8. Connect the screens in Prototype mode and demonstrate the user flow.

Figma Prototype

Prototype Flow: Home → Product Listing → Product Details → Shopping Cart → Checkout

Result

Thus, the E-Commerce mobile app prototype was created successfully in Figma. The prototype can be presented to stakeholders to discuss the interface, collect feedback, and obtain approval for the design.
