EXP-5

MoSCoW Prioritization for a Library Management System

Aim

To categorize the requirements of a Library Management System using the MoSCoW prioritization method and provide justification for each priority.

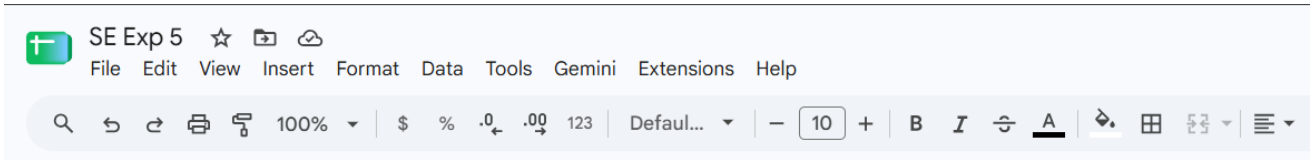

Procedure

1. Open Google Sheets and create a new spreadsheet.
2. Enter the title 'Library Management System'.
3. Create the columns S.No, Requirement, Priority, and Justification.
4. List the ten requirements for the Library Management System.
5. Classify each requirement as Must Have, Should Have, Could Have, or Won't Have (for now).
6. Provide a justification for each assigned priority.
7. Review the spreadsheet and save it for submission.

Tool Used

Google Sheets

Spreadsheet Screenshot

	A	B	C	D	E
1		Library Management System			
2	S.No	Requirement	Priority	Justification	
3	1	Search books by title and author	Must Have	Essential for finding books.	
4	2	Online book reservation system	Must Have	Allows users to reserve books.	
5	3	Monthly reports on borrowed books	Should Have	Helps administrators monitor borrowing.	
6	4	Email notifications for overdue books	Should Have	Reminds users to return books.	
7	5	QR code scanning for borrowing and returning	Could Have	Makes book transactions faster.	
8	6	User-friendly librarian dashboard	Must Have	Helps librarians manage library activities.	
9	7	Book reviews and ratings	Could Have	Helps users evaluate books.	
10	8	Chatbot for user assistance	Could Have	Provides automated support.	
11	9	Mobile app version	Won't Have (for now)	Developing and maintaining a separate mobile app may require additional time and resources; the web version can be prioritized first.	
12	10	Multi-language support	Won't Have (for now)	Translation and testing require additional resources, so this feature can be considered in a future release.	
13					

Result

Thus, the requirements of the Library Management System were prioritized using the MoSCoW method, and each requirement was assigned a category with a justification.
