EXPERIMENT 14

UML Diagrams for Online Food Delivery System

Aim

To design and model an Online Food Delivery System using UML diagrams in Umbrello UML Modeller, including Class, Use Case, and Activity diagrams.

Procedure

Open Umbrello UML Modeller and create a new UML project.

Create a Class Diagram and add the Customer, Restaurant, MenuItem, and Order classes with their attributes and operations.

Connect the classes using association relationships to represent their interactions.

Create a Use Case Diagram and add the Customer, Restaurant, Delivery Agent, and Admin actors.

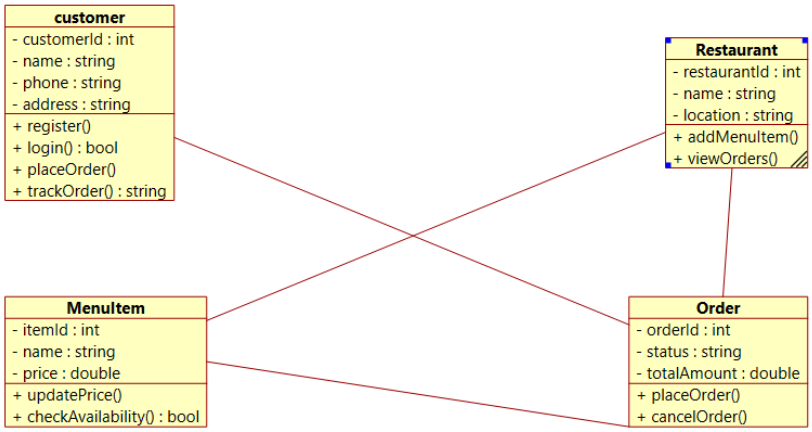

Add the required use cases and connect each actor to the relevant use cases using association lines.

Create an Activity Diagram and add the initial node, activity nodes, control-flow arrows, and final node.

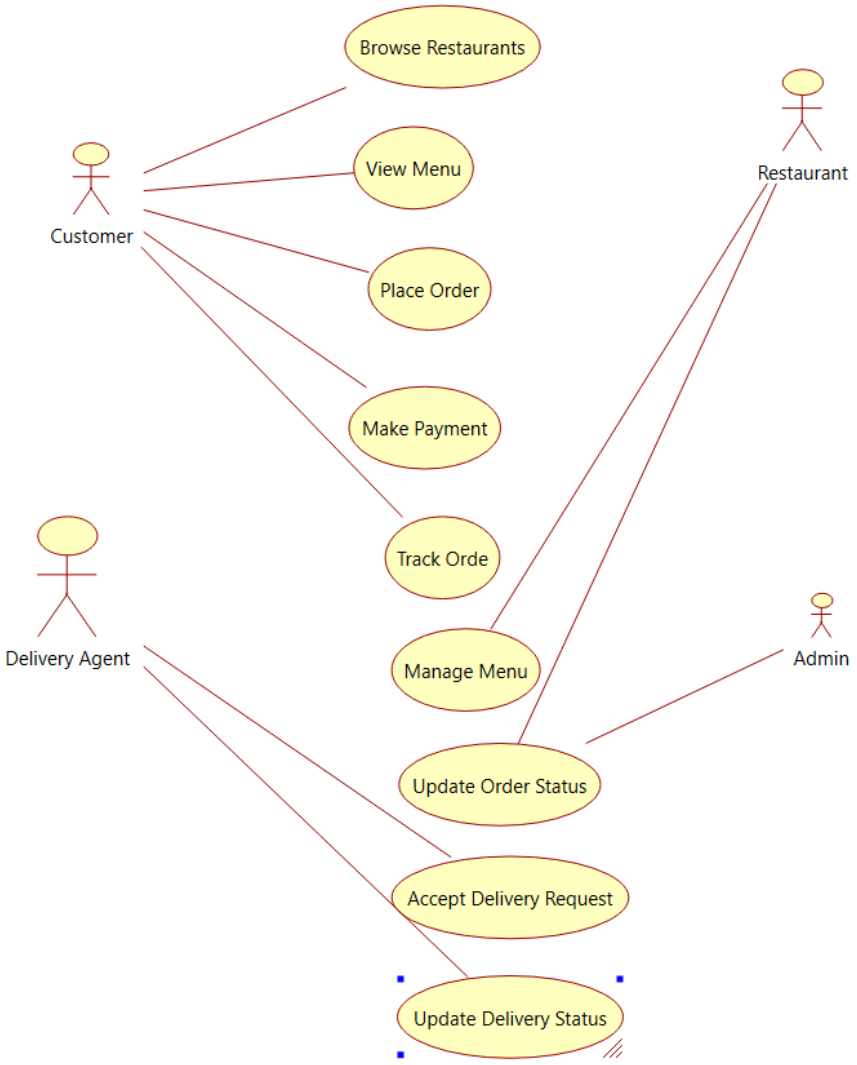

Arrange the diagrams clearly and save the project.

Output

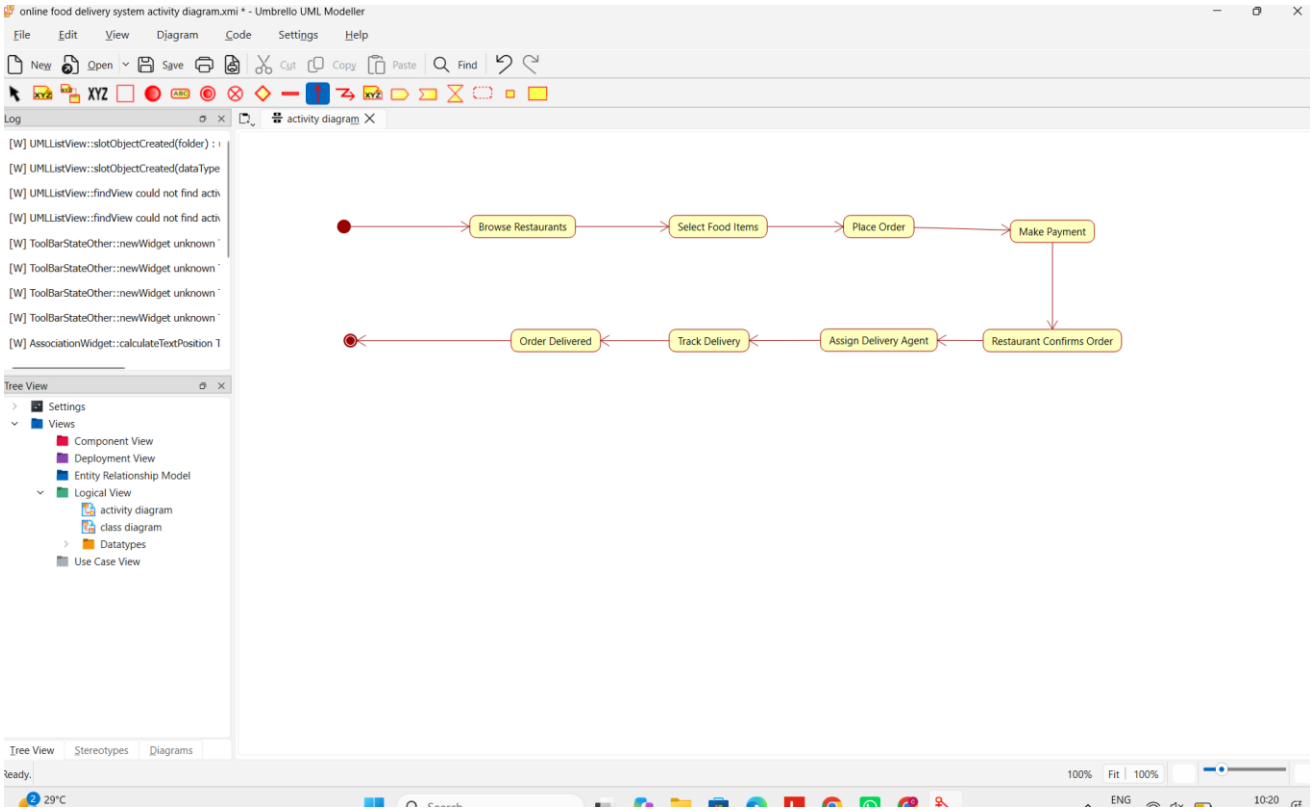

Class Diagram

Use Case Diagram

Activity Diagram

Result

The Class, Use Case, and Activity diagrams for the Online Food Delivery System were successfully created using Umbrello UML Modeller.
